Who are we?

Johan Eykens

For more than 25 years I have been active in the health care sector, representing companies, promoting products with competent authorities, academics, health funds and healthcare professionals. As a former member of the Belgian Medicines Reimbursement Committee and former chair at the Federal Agency of Medicines, I value the close collaboration with Health Care Authorities.

Sofie Verhaegen

I became really passionate about the pricing and reimbursement environment when I was still in university. I had the opportunity to do an internship at Pfizer in market access. After working in the regulatory environment, I joined E&A consultants in 2018. I think a really important message in our job, and moreover our goal is to make the healthcare system more accessible for every one of us.

Lisa Thyrión

After completing my PhD in medical sciences, I switched to the pharmaceutical sector in look of a stronger focus on patient welfare, in which I strengthened several medical teams. The close collaboration with market access during this period spiked my interest in pricing and reimbursement as a key element of delivering healthcare to the patient and stimulated me to join the E&A team in 2019.
